■ INNOVATIONS IN HOME LIVING

YOU'VE PICTURED IT A THOUSAND TIMES—  
YOUR PERFECT HOME.  
A PLACE TO ENJOY LIFE...  
TO BE TOGETHER...  
TO JUST BE.  
NOW IS YOUR CHANCE TO MAKE  
YOUR NEW HOME EXACTLY  
WHAT YOU'VE IMAGINED.

# YOUR HOME, YOUR WAY

The technology options for your new home are designed to work individually or together. Customize a package just for you, choosing the features that make the most sense for the way you live and your budget.

## ENTERTAINMENT

**Home Theater**—Kick back with family or entertain in style with your own home theater.

**Audio**—Fill your life with music with a whole house audio system.

**TV**—Create a home that fits your life today and tomorrow with convenient TV access.

## COMMUNICATION

**Intercom**—Keep your family in sync with easy hands-free intercom communication throughout your home.

**Internet**—Stay connected with high-speed Internet access throughout your home.

**Telephone**—Be in touch with ease! Today's advanced wiring accommodates multiple lines, fax and Internet from the same jack.

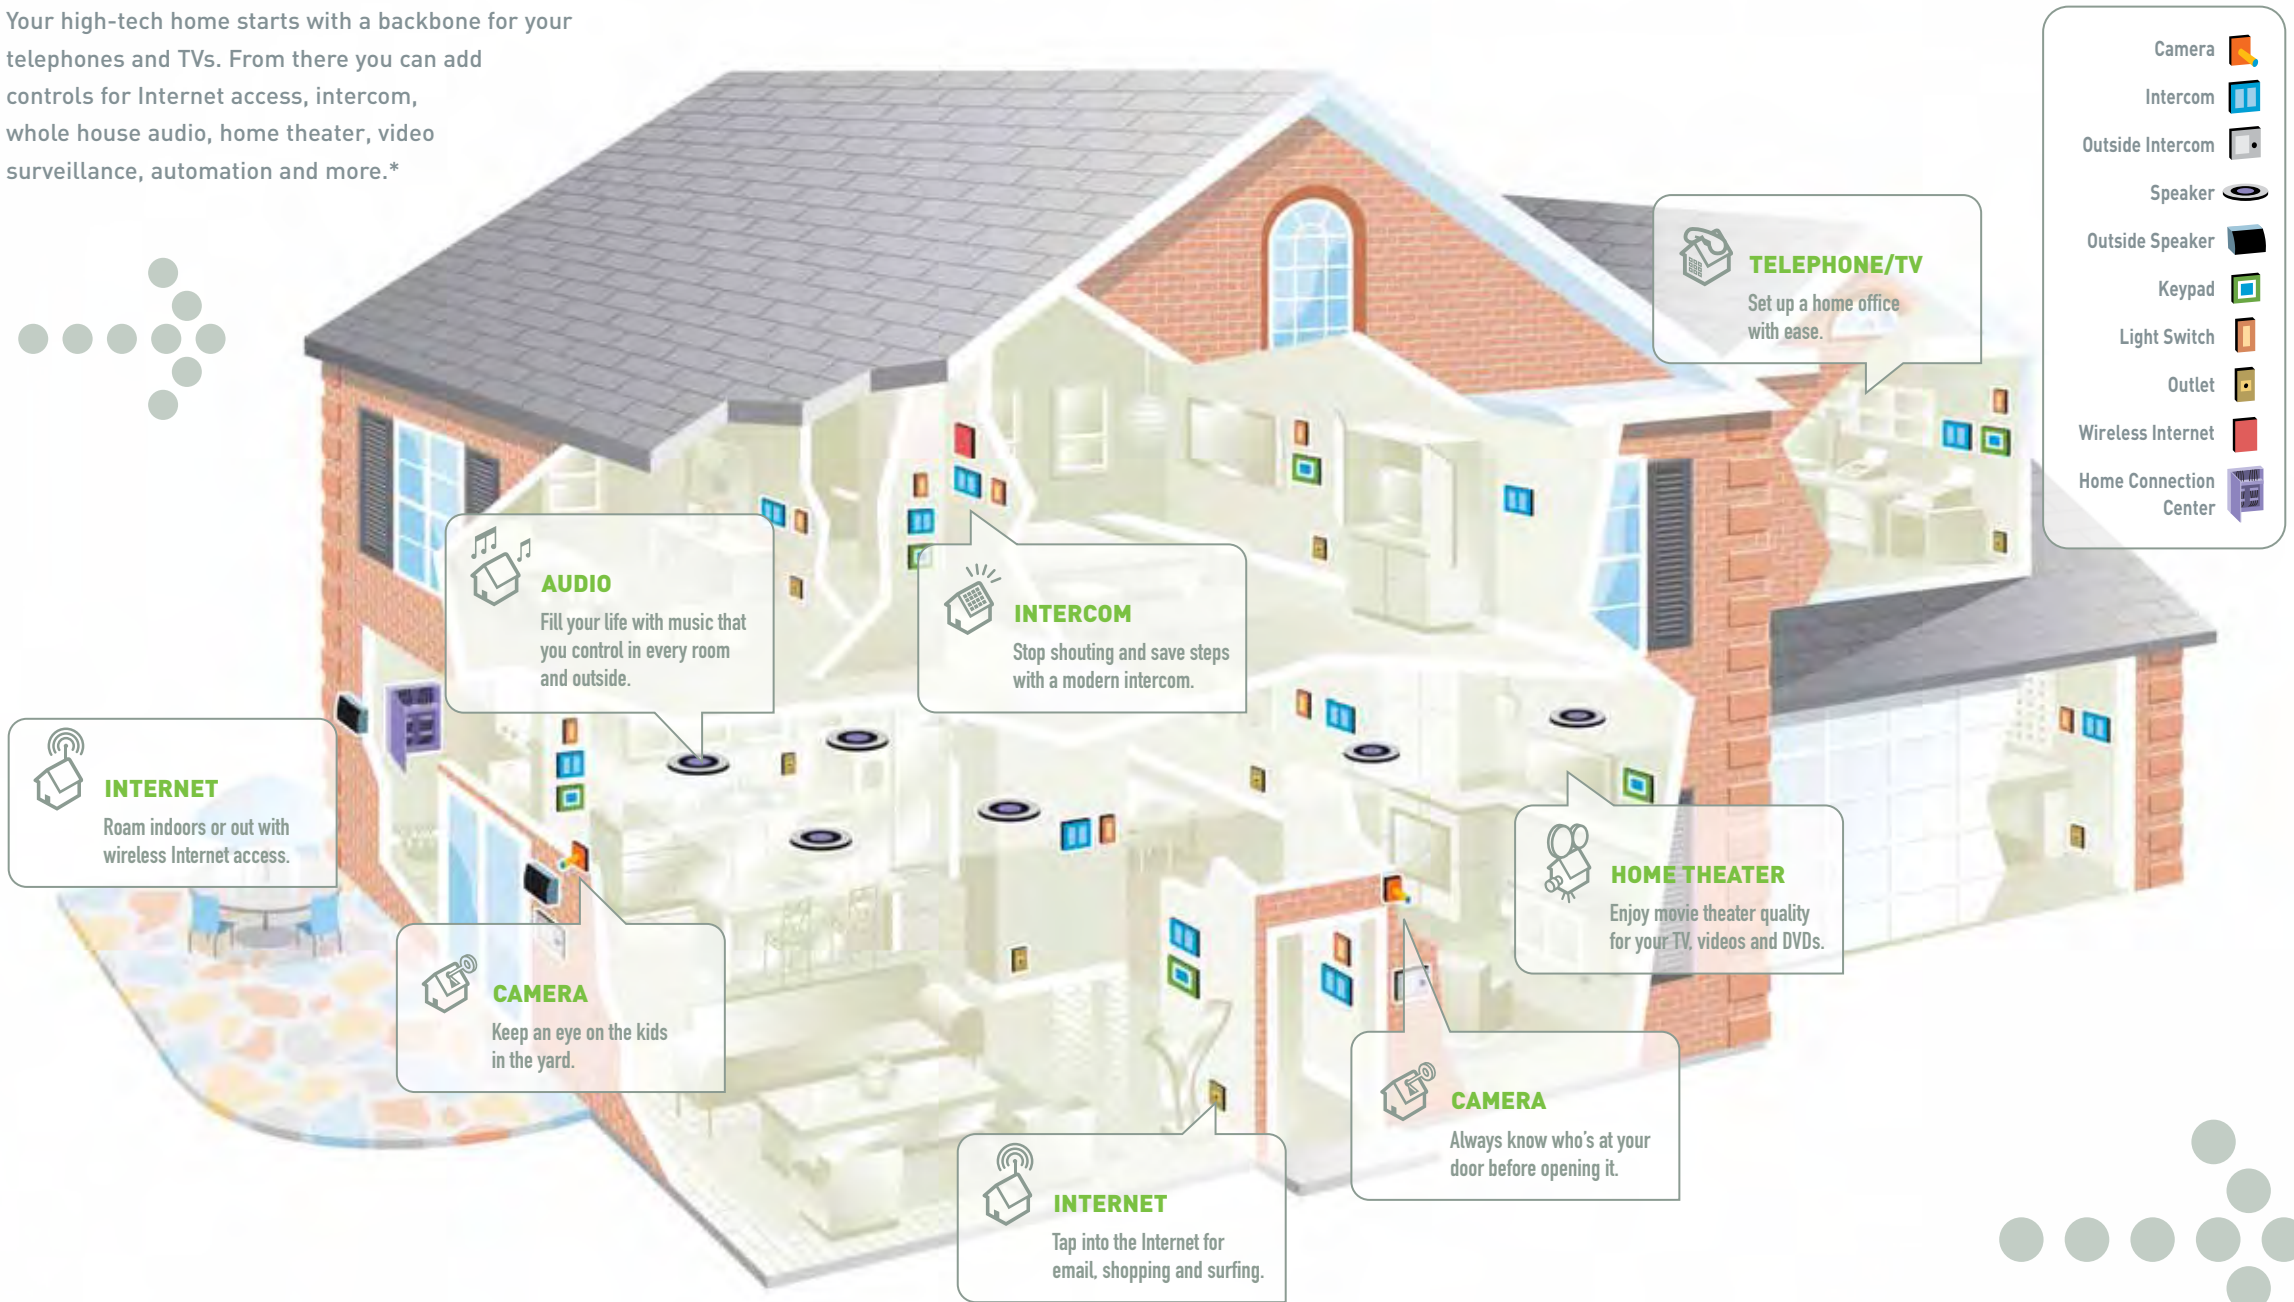

## COMFORT

**Camera**—Keep a watchful eye on your home and loved ones with a visual monitoring system.

## THE SMARTEST HOME ON THE BLOCK

Your high-tech home starts with a backbone for your telephones and TVs. From there you can add controls for Internet access, intercom, whole house audio, home theater, video surveillance, automation and more.\*

**INTERNET**  
Roam indoors or out with wireless Internet access.

**AUDIO**  
Fill your life with music that you control in every room and outside.

**INTERCOM**  
Stop shouting and save steps with a modern intercom.

**CAMERA**  
Keep an eye on the kids in the yard.

**INTERNET**  
Tap into the Internet for email, shopping and surfing.

**CAMERA**  
Always know who's at your door before opening it.

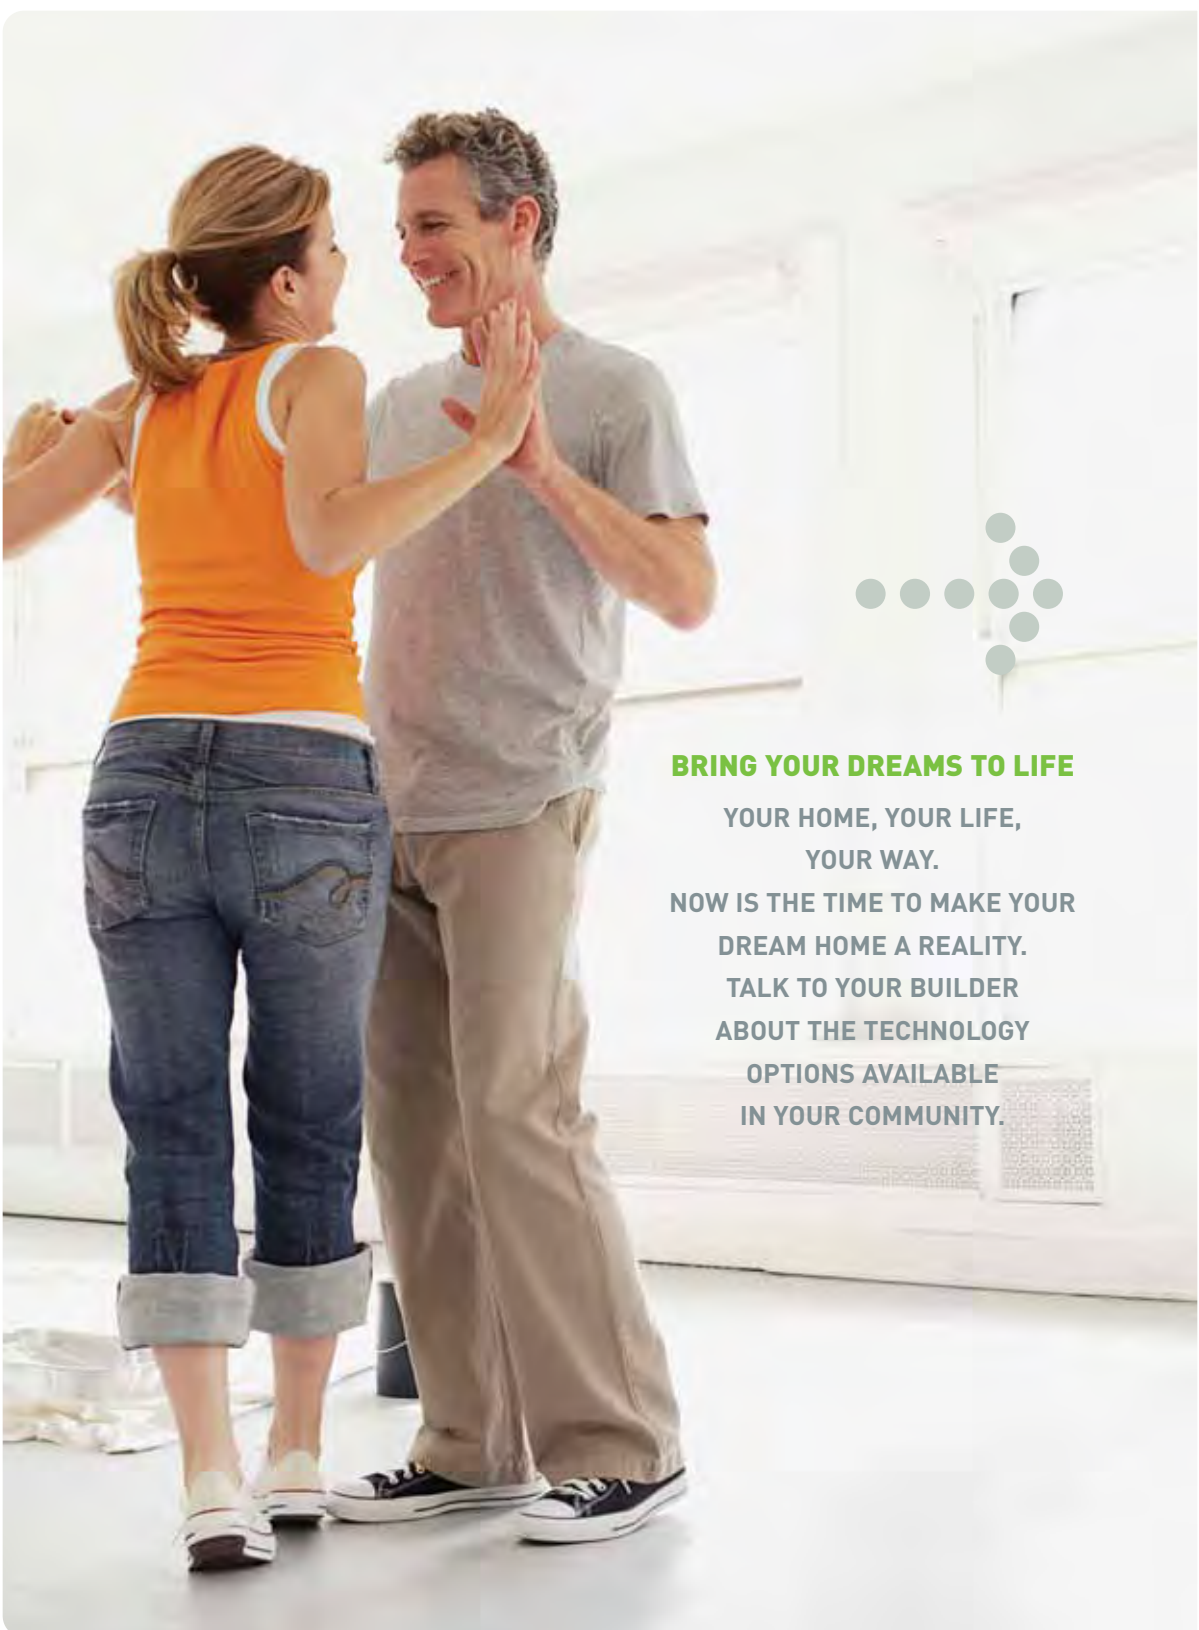

**HOME THEATER**  
Enjoy movie theater quality for your TV, videos and DVDs.

**TELEPHONE/TV**  
Set up a home office with ease.

- Camera 
- Intercom 
- Outside Intercom 
- Speaker 
- Outside Speaker 
- Keypad 
- Light Switch 
- Outlet 
- Wireless Internet 
- Home Connection Center 

\* Not all options are available from every builder. Check with your builder to see what's offered for your home.

# inQUIRE™ INTERCOM

## SIMPLIFY YOUR LIFE

### Stay put!

Stop running up and down the stairs. And end the yelling to pick up the phone or come to dinner. Hands-free feature lets you call from the main unit to all other room units, and the family members can reply without even pressing a button.

### Monitor your loved ones

Never be more than a few steps away from easily monitoring a child or family member from any intercom location. No receivers to carry, no batteries to replace and no worries about unreliable wireless baby monitors.

### Screen visitors at your door

Know who's at your door before you answer it. Talk with visitors from any speaker location, or get even more security with high-resolution cameras and compact LCD screens that let you both see and talk.

### Never miss a delivery

Tired of missing deliveries because you couldn't hear the doorbell? With the inQUIRE™ Intercom, you can hear your doorbell and greet visitors from every speaker location. The

optional chime plays three different musical tunes.

### Enhance your décor

No more '70s-style, bulky units to clutter your walls. The inQUIRE™ Intercom has a sleek, contemporary design that fits standard wall plates, and colors that blend perfectly with your home décor.

## FEATURES & BENEFITS

**Monitor babies, small children or elderly**

**Monitor multiple rooms at the same time**

**Save steps—and your voice**

**“Do not disturb” function**

**Hands-free reply & convenient door release**

**LEDs to show stations in-use, muted or monitored**

■ INNOVATIONS IN HOME LIVING

## SET THE MOOD

### Create a music-filled environment

Enjoy the music you love throughout your home. Select a music source from many options—CDs, digital music, satellite radio, tuner, stereo. Then personalize the sound in every room via user-friendly keypads that let you turn the music on or off and set the volume.

### Choose single-source or multi-source options

Expand your options and satisfy different tastes. Music can be generated from a single source, such as the stereo in your family room, or multiple sources, say your stereo and your daughter's iPod®. Keypads in each room control which source you tap into for that room.

### Stay put!

Ooops, there's the phone. No need to race to turn down the music. Infrared remote technology lets you control all the keypads as well as your stereo equipment from anywhere in the house.

### Enjoy beautiful music—without the clutter

Tired of trying to hide miles of wire and camouflage bulky speakers? lyriQ™ Audio Solutions replace clutter with hidden system wiring and unobtrusive in-wall and in-ceiling speakers and controls.

### Expand outside

Forget having to crank the stereo to hear it out on the deck. Adding outdoor speakers lets you enjoy music outside too—great for a leisurely breakfast on the patio or Saturday night barbecue with the neighbors.

### Enhance your lifestyle

Music has the power to refresh, de-stress, exhilarate, relax, energize—whatever your soul needs. lyriQ™ Whole House Audio puts that power at your fingertips.

# CAMERA

## BE SECURE

### Monitor family members' safety

You'd love to be everywhere at once to make sure your family is OK. An On-Q Camera System is the next best thing. Monitor your baby in his crib, the neighborhood kids in the yard or your teenagers hanging out with friends in the pool.

### Feel secure in your home

Peace of mind comes from knowing everything in and around your home is as it should be. Whether you live in a busy neighborhood or off a secluded road, cameras let you keep a watchful eye on your property, inside and out.

### Easily see what the camera sees

Cameras can be set to display on a particular TV channel you choose, on a sleek, compact LCD screen or even over the Internet via IP video. You can display up to four cameras on a single screen, or scroll through each camera in a controlled sequence.

### Be confident—even away from home

Why worry about loved ones, pets or your property when you're not at home? With an IP video server,

you can use your computer to see the action at home while you're away. The server can also record camera images and store them on your hard drive.

### Enhance safety discreetly

Safety doesn't have to detract from your home's appearance. Our cameras are small-sized and discreet to blend with their surroundings and easily adjusted for proper viewing. Sleek LCD displays are just 3.5" with color-matched wall plates.

## FEATURES & BENEFITS

**Keep a watchful eye on family members**

**Monitor doors, windows and other access points**

**Easily adjustable for proper viewing angles**

**TV, LCD screen or Internet viewing options**

**Low-light sensitivity for better viewing at night**

**Various camera styles available for every décor**

■ INNOVATIONS IN HOME LIVING

# LIGHTING

## BRIGHTEN YOUR WORLD

### Set the tone

Bright and cheerful or soft and romantic—you decide how you want your home to feel by choosing how to light it. Whether you control one room or the whole house, lighting options are easy and affordable for every size home.

### Light it perfectly every time

Do you like it dim when you watch movies and bright for homework or cooking? Instead of searching for that perfect setting every time, one-touch shortcuts called “scenes” let you set a favorite light level once, then recall it with the touch of a button.

### Add comfort and security

Never come home to a dark house or rush to switch off lights when you leave. From the comfort and safety of your vehicle, you can turn on groups of lights by remote control as you arrive home or turn lights off as you pull out of the driveway.

### Save energy

Lighting empty rooms wastes energy and your money. Intelligent lighting options include vacancy

sensors to automatically turn lights off if they no longer sense movement in the room. This feature also complies with state-mandated building codes, such as Title 24 in California.

### Start slow if you want

Not sure what kind of lighting you’ll want down the road? No problem. As long as the control system is in place, your lighting can be easily upgraded later. A small investment in a “backbone” now will give you many options for comfort, style and convenience in the future.

## FEATURES & BENEFITS

**Transform any room for reading, relaxing or romance**

**Enhance security throughout your home**

**Easily control outdoor and holiday lighting**

**One-touch buttons recall your favorite light levels**

**Easy, infrared remote controls**

**Energy savings**

# INTERNET

## EXPAND YOUR HORIZONS

### Tap into the web

Home office, home shopping, homework...fast, reliable Internet access with an On-Q Internet Solution makes them all easier. Whether you just want to email family and friends or run a full-blown business, your home can be configured to provide the best in capabilities, versatility and convenience.

### Network to save money and share resources

Networking lets you share printers, files, games, music and more among all the devices in your house. One high-speed connection via cable or DSL (with only one monthly fee) can be routed to serve everyone's needs.

### Combine wired and wireless for the ultimate network

A hard-wired backbone gives your network the best reliability. Adding wireless components gives everyone freedom to roam. It's the best of both worlds!

### Clear the clutter

Plug into the Internet as cleanly as you plug in a lamp. Wall plates blend with your décor, and wireless access points are unobtrusive—similar to an

in-wall speaker or smoke detector in appearance.

### Roam free!

A sunny day, a cold drink and your laptop—you're off to the deck to check email, surf the web or write that report. Wireless access points can be unobtrusively installed in your walls or ceiling to provide strong, uniform coverage. Wireless products include built-in firewalls and security.

## FEATURES & BENEFITS

**Enjoy Internet access in every room and outside**

**Share equipment, games, music**

**Best speed & best coverage for wireless connections**

**Unobtrusive 802.11g wireless access points**

**Advanced encryption for state-of-the-art security**

**Wireless data rates up to 54 Mbps**

## HEAR THE DIFFERENCE

### Enjoy your free time

Life is busy—work, family obligations, errands, chores. When it's finally time for leisure, why not get the most from your favorite TV show, sports event or movie? An On-Q Home Theater is affordable relaxation therapy!

### Put yourself in the action

Surround yourself with riveting movie sound and superb musical performances. Hearing full-spectrum sound from the front, sides and rear puts you in the center of the action and adds drama and excitement to your entertainment.

### Get better results, plus no clutter

Sure you can buy a home theater system off the shelf. But you'll also have to deal with situating bulky components and hiding wires and cables. In-wall and in-ceiling solutions give you amazing clarity and acoustic quality without the clutter. And a convenient built-in "connection center" makes it simple to hook everything up.

### Enhance that big screen

You bought the "perfect" TV for a reason. It deserves the perfect sound to cap it off and give you the full entertainment experience you had in mind. Cable, satellite, DVD, videos, the Internet—they're all enhanced with the right home theater system.

### Entertain in style

Face it—people want to get together in the most comfortable surroundings with the best amenities. An On-Q Home Theater system makes your home the logical choice for your family and friends to enjoy being together.

## FEATURES & BENEFITS

**Experience the full range of cinematic sound**

**Add drama and excitement to whatever you watch**

**Keep your home free of wire clutter**

**5.1, 6.1 or 7.1 surround sound systems available**

**In-wall & in-ceiling speakers**

**High-performance sub-woofer**

# TELEPHONE & TV

## PLUG AND PLAY

### Avoid hassles and save money

If you've ever had to add phone or cable to a finished room or arrange a room around the jack locations, you know how frustrating it can be. Building your new home gives you the chance to eliminate future hassles and add ample phone and TV access easily and inexpensively before the walls go up.

### Meet needs today and down the road

Suppose today's nursery becomes tomorrow's home office. Or the formal living room morphs into a cozy den. By including multiple phone and TV connections throughout your home, you give yourself the freedom to change rooms as your needs change.

### Take advantage of versatile technology

Today's high-speed cables offer the best picture and sound quality and the most versatility. Coaxial cable is ideal for your cable TV, and Cat 5 cable is the smart, flexible choice to handle phones, computers or fax machines at the same jack.

### Add phone lines with ease

Need a second phone line for a home office? Or maybe a separate line for that chatty teenager? Every Cat 5 cable accommodates up to four phone lines, so you can easily add the lines you need. You can also control where each line rings.

### Create an entertainment network

Options are available that allow you to share equipment like DVD players and VCRs throughout your home, so you can watch and control DVDs or videos on any TV. You can also amplify your cable signal to ensure the clearest picture on every channel.

## FEATURES & BENEFITS

**Ensure phone and TV access wherever you want**

**Easily switch between phone, computer and fax at any jack**

**Set up a home office with ease**

**Amplified TV signal for better picture quality**

**Networking capabilities to share video and DVDs**

**Multiple phone lines at every location**

■ INNOVATIONS IN HOME LIVING

# HOME CONNECTION CENTER

## WHERE BEAUTY MEETS BRAINS

### It all starts here

Building your dream home from the ground up gives you the chance to add today's "smart" technology to enhance entertainment, communication and comfort. The Home Connection Center is where it all comes together. Signals from the outside world (telephone, cable TV, satellite, Internet) enter the Home Connection Center and are distributed throughout your home.

### The Connection Center

All wires and cables run between the Home Connection Center (typically located in a central closet, utility room or basement) and various connections points providing a clean, uncluttered look.

### The Cables

High-quality, high-speed cables run from the Home Connection Center to various connection points. Cable TV travels over coaxial cable, and Cat 5 cable efficiently handles transmissions for phones, fax machines and high-speed Internet.

### The Outlets

Outlets, conveniently placed throughout your home, are the access points where you plug into cable TV, phone or the Internet. The entire system is fully scalable—you can configure it any way you like and easily add features.

## FEATURES & BENEFITS

**Set the foundation for home technology**

**All wires run directly to the connection center behind the walls**

**Distribute incoming services where you need them**

**Services can easily be re-routed in the home as your needs change**

**High-quality, high-speed cables & connections**

**Add resale value to your home**
